

NIOCC Interoperability Program Update

August 14, 2024

Status Update

- Topics for discussion
 - PCA
 - PCA Pricing
 - Forest Guide
 - Financial Reporting

PCA Updates

- The revised Certificate Policy has been posted to NIOC's website
- Interest remains high from NGCS vendors in onboarding to the PCA
- Initial discussions have taken place with several NGCS providers
- These discussions have demonstrated both a lack of clarity on how the pricing is presented and how the PCA should be implemented
- Pricing is a barrier to onboarding new subscribers

PCA Pricing

- Three different pricing proposals have been developed for consideration
- The desired outcomes of revising the pricing:
 - Onboard more subscribers to the PCA
 - Simplify the pricing and the way it is presented

PCA Initiatives

- Update the NIOC web site with new FAQs and create a tab specific to pricing
- Identify industry events NIOC should attend
- Update marketing materials
- Develop a social media presence

Forest Guide Updates

- Change order was approved, signed, and returned to Intrado
- Working with product manager to finalize schedule
- The Forest Guide will be tested at the next ICE Event in October 2024

Financial Reporting

- An initial financial report is now available
- Work continues to better streamline the reporting process
